Summary

AI & ML undergraduate with strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and DBMS. Experienced in building scalable full-stack applications and machine learning models using Python, Java (J2EE), and AWS. Strong problem-solving ability with hands-on experience in backend development, cloud computing, and system design.

Education

Nitte Meenakshi Institute of Technology, Bangalore 2023 – 2027
B.E. in Artificial Intelligence and Machine Learning

Gitam Junior College 2021 – 2023
Intermediate (Science)

Rayalaseema High School 2020 – 2021
Secondary School Certificate (SSC)

Projects

AWS Cloud Infrastructure Project *EC2, S3, IAM*

- Provisioned and managed EC2 instances and S3 storage with versioning, improving system reliability and scalability.
- Configured IAM users, roles, and policies using least-privilege principle to enhance cloud security.
- Applied AWS best practices including resource management, access control, and cost optimization strategies.

Food Delivery System *Java (J2EE), JDBC, DBMS*

- Developed a full-stack food delivery application with modules for users, orders, restaurants, and delivery tracking.
- Designed normalized relational database schema and optimized SQL queries for efficient data handling.
- Implemented backend using JDBC ensuring reliable transaction processing and system integration.

Brain Tumor Segmentation using Deep Learning *Python, CNN*

- Built a CNN-based deep learning model for multi-class tumor segmentation using BraTS MRI dataset.
- Performed preprocessing, normalization, and feature extraction on 3D medical imaging data.
- Evaluated model performance using Dice coefficient and IoU, improving segmentation effectiveness.

Billing System — POS Application *HTML, CSS, JavaScript*

- Developed a browser-based POS billing system with dynamic invoice generation and product management features.
- Implemented LocalStorage for persistent data storage enabling efficient transaction tracking.
- Designed responsive UI to enhance usability and streamline billing workflows.

Experience

Marketing Intern — Corizo Edutech Pvt. Ltd. Nov 2025

- Engaged 50+ students through outreach initiatives and technical awareness programs.
- Assisted in onboarding 20+ students into training programs, improving participation rates.
- Collaborated with teams to improve communication strategies and student engagement.

Technical Skills

Languages	C, C++, Python, Java (J2EE), SQL
Core CS	Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Cloud	AWS (EC2, S3, IAM)
ML	NumPy, Pandas, Data Preprocessing, Computer Vision
Web	HTML, CSS, JavaScript
Tools	Git, GitHub, Linux, VS Code

Certifications

- Data Structures and Algorithms using Python – Part 1
- Java Class Library – Coursera
- Java Programming: Solving Problems with Software – Coursera

Languages

English, Telugu, Kannada, Hindi
